A practical approach to transesophageal echocardiography ...

Transesophageal echocardiographic Doppler views for assessing aortic stenosis. In AS, aligning the transesophageal transducer parallel to the left ventricular outflow tract (LVOT) and aortic valve can be challenging. The deep transgastric (TG) long-axis and TG long-axis views are commonly used . Advancing from the TG short-axis view and anteroflexion of the probe head to visualize the heart from near the LV apex allow acquisition of the deep TG long-axis view.
