MCQ on Human Reproduction with Answers

Humans Must Develop Male or Female Gonads and Genitalia to be Capable of Reproduction
Reproductive structures begin to form in the embryonic stage. By week 6, gonads and genitalia are present but undifferentiated. Whether they become male or female is determined by one chromosome delivered by the sperm.

File Type PDF Answer Keys To Human Reproduction Webquest

Reproductive Process - Human Body

The reproductive tissues of male and female humans develop similarly in utero until about the seventh week of gestation when a low level of the hormone testosterone is released from the gonads of the developing male. Testosterone causes the primitive gonads to differentiate into male sexual organs.

13.3 Human Reproduction - Concepts of Biology - 1st ...
