As shown in Table 2, an LDL cholesterol level of <100 mg/dL is optimal; therefore, ATP III specifies an LDL cholesterol <100 mg/dL as the goal of therapy in secondary prevention. This goal is supported by clinical trials with both clinical and angiographic endpoints and by prospective epidemiological studies.

Both ATP III and ACC/AHA guidelines carried out 10-year risk assessment to guide drug therapy. ATP III recommended consideration of drug therapy when 10-year risk for CHD was \geq 10%. ACC/AHA set a threshold for statin drugs at 7.5% for ASCVD. Even \geq 5% risk was considered a therapeutic option for statin therapy.

Then and Now: ATP III vs. IV - American College of Cardiology

Guideline is a related term of guide. As nouns the difference between guideline and guide is that guideline is a non-specific rule or principle that provides direction to action or behaviour while guide is someone who , especially someone hired to show people around a place or an institution and offer information and explanation. As a verb guide is to serve as a guide for someone or something.

Guideline vs Guide - What's the difference? | WikiDiff

The ATP 3 team consists of world-class scientists, engineers and business executives who lead the national network of algae testbeds. Our diversely skilled experts enable objective testing and evaluation of algae systems and technologies. They specialize in the comparison of the performance of systems under different climatic and operational conditions at a much larger scale.
