CDC developed case studies in applied epidemiology based on real-life epidemiologic investigations and used them for training new Epidemic Intelligence Service (EIS) officers — CDC's "disease detectives." EIS offers these carefully crafted epidemiology case studies for schools of medicine, nursing, and public health to use as a component of an applied epidemiology curriculum.

In mid-June, CDC conducted its first TSS case-control study (CDC-1). Published in the MMWR of June 27, the study of 52 female cases and 52 age- and sex-matched friend controls found a statistically significant association between tampon use and TSS. The report cited two independent preliminary studies from Wisconsin (31 cases) and Utah (12 cases).
