drawing is a type of technical drawing that is used to convey information about an object. A common use is to specify the geometry necessary for the construction of a component and is called a detail drawing. Usually, a number of drawings are necessary to completely specify even a simple component. The drawings are linked together by a master

In Engineering Graphics I, students will master traditional drafting and sketching techniques in addition to learning to use industry-standard CAD (computer- aided design) software. Students will be tasked with designing solutions to real-world problems. These designs will be brought to life as models via 3D printing and laser engraving.
