Introduction to Analysis - Edward Gaughan - Google Books

This is an introductory course in real analysis that covers basic topics such as convergence, continuity, differentiation, and integration for functions of a real variable. The emphasis is on a deep understanding of these topics, on critical and logical thinking, and on the construction of clear, correct, coherent, and succinct proofs.

MA452/502 Lectures

demonstrating solutions. The goal at first is to offer ideas for analyzing the problem. Later in the term the goal is to ensure that groups can make use of the ideas offered repeatedly earlier. At the end of each workshop session, one problem will be assigned to
