Upgrading Your Engine | CorkSport Mazda Performance Blog

If possible, the air filter element should be located in an area of the engine compartment that allows the engine to draw in "cooler" external ambient air. On the early 1990-97 Miata chassis this was difficult due to the design of the engine compartment, while the later 1999-2005 Miata chassis offered more inlet air possibilities.

Top 5 Miata Performance Upgrades - Racing Beat

The Mazda B-series engine - not to be confused with the Mazda B-Series truck - is a small-sized, iron-block, inline four-cylinder with belt-driven SOHC and DOHC valvetrain ranging in displacement from 1.1 to 1.8 litres. It was used from front-wheel drive economy applications to the turbocharged full-time 4WD 323 GTX and rear-wheel drive Miata as well as numerous other models.

Mazda B6 Engine Specification

Turbos provide boost in exponential proportion to th engine speed and this can make mapping difficult. Superchargers, however will give a boost which is proportional to engine speed so is easier to map. To cope with forced induction you will usually need to decrease the engine compression ratio . Anyways guys, I have a Mazda Protege 323 2000 and it has a 1.6L DOHC engine in it that only produces 78kw's but the car only weights 1100kg's so it is easy to make a light car like this fast so just wondering how much kw's I can get without putting a turbo (P-Plates) or swapping the engine all together and tell me how much it would cost aswell thanks .

Most power you can get out of a 1.6L DOHC - Mighty Car ...

Hello everyone, There is an old miata mod on a russian site that is actually quite decent So i decided to make it better! EDIT : The original mod is actually from @KG Benz, so sorry for ignoring it in the first place, and big thanks to him for the original mod that is actually quite nice What did i do so far?
