Oracle Database Cloud For Oracle

Oracle Enterprise Database Cloud Service is an affordable cloud service with Oracle managed infrastructure and customer managed database instances. Reduce costs with consumption-based subscription pricing on optimized cloud infrastructure that delivers up to 2.6X better price/performance.

Enterprise Database Cloud Service | Oracle

Oracle Database Classic Cloud Service runs on Oracle Cloud Infrastructure Classic to provide you the ability to create full, running deployments of Oracle Database release 18, 12.2, 12.1 or 11.2 quickly and easily. For information about the Oracle Database cloud services on Oracle Gen 2 Cloud Infrastructure, see Bare Metal and Virtual Machine DB Systems.

Oracle Database Classic Cloud Service - Get Started

Oracle Database Cloud Service provisions a DB system with the requested number of cores on a high performance bare metal server or virtual machine, deploys Oracle Database software with the edition of your choice, and creates the DB system in a virtual cloud network (VCN). The VCN is a private network with user-configured security lists which protects the DB system from unauthorized access.

Database Cloud FAQ | Oracle

**The database can be a container database with multiple pluggable databases, if the edition is High Performance or Extreme Performance. Oracle Cloud Infrastructure DB Options DB Systems

Oracle Cloud Infrastructure Database Services

The Oracle Database Cloud Service is a managed platform as a service (PaaS) offering from Oracle in which your databases are hosted on Oracle infrastructure. When you use this service, you are responsible for your databases but Oracle takes care of managing and maintaining the underlying infrastructure.

Oracle Database in the Cloud: Azure vs AWS vs Oracle

The Oracle Cloud Database offers the same benefits that Oracle customers have come to expect from their world-class Oracle databases, but its cloud deployment model helps the Oracle Cloud Database deliver better agility, faster business operational speed, lower risks, and lower costs, when compared to an on-premises database solution.

Oracle Cloud Database vs On-Premises - Understanding the ...

Oracle Cloud Infrastructure (OCI) is an IaaS that delivers on-premises high-performance computing power to run Cloud native and enterprise company's IT workloads. OCI provides real-time elasticity for enterprise applications by combining Oracle's autonomous services, integrated security, and serverless compute. Available for public cloud.

Cloud Infrastructure | Oracle

Oracle Cloud Infrastructure offers single-node DB systems on either bare metal or virtual machines, and 2-node RAC DB systems on virtual machines. If you need to provision a DB system for development or testing purposes, a special fast-provisioning single-node virtual machine system is available. You can manage these systems by using the Console, the API, the Oracle Cloud Infrastructure CLI, the Database CLI (DBCLI), Enterprise Manager, Enterprise Manager Express, or SQL Developer.
