Metabolic rate. This is how fast your metabolism works and is measured in calories (yup, those calories!). The calories you eat can go to one of three places: Work (i.e. exercise and other activity). Heat (i.e. from all those biochemical reactions). Storage (i.e. extra leftover "unburned" calories stored as fat).

What is Metabolism? - Living Well Chiropractic & Massage

The increased acceptance of metabolic surgery has been enhanced by many advancements in minimally invasive surgical techniques, formal training of bariatric surgeons, a rigorous accreditation process for recognition of bariatric surgeons and bariatric centers, and emergence of less invasive procedures (e.g., sleeve gastrectomy).
