How Crafting Visual Arts Contributes to SEL Storytelling: Creating art is a practice in both communication and empathy that affects the storyteller (in this case, the student artist) and the person viewing the story (peers, teachers, and counselors). Art gave the students I worked with new ways to process and tease out meaning, and to share their lived experiences.

New cognitive research out of Germany suggests that "the production of visual art improves effective interaction" between parts of the brain. The study, conducted on a small population of newly retired individuals (28 people between the ages of 62 and 70), concludes that making art could delay or even negate age-related decline of certain brain functions.

Study Says Making Art Is Good For Your Brain, And We Say ...

language to describe art; and discovering the expressive qualities of art to be able to reflect, critique, and connect personal experience to art.

VAPA Visual Arts - Content Standards (CA Dept of Education)

Creating Art. Making art invigorates the brain in ways that are distinct from merely viewing art. Studies have credited the production of visual art with increases in functional connectivity in the brain along with enhanced activation of the visual cortex. Researchers liken creating art with exercise for the brain, and even suggest that similar ...
